✓ Do:

- Report for work early
- Check supplies: radio, red flag, fire extinguisher and extra cones
- Agree on duties:
 - Most experienced worker operates radio
 - One worker holds red flag, unfurled but gathered in hand, ready to wave in a safety situation
 - Other workers spread out, safely locating themselves near where cones are being hit, and replace cones
- Know which cones are your responsibility
- Check cone placement both before and during heat
- Replace cones as quickly as possible, without endangering yourself
- Red flag a car if there is a safety issue unfolding for the workers or any car on course. *If in doubt, always err on the side of safety!*
- Pay careful attention to cars and cones at all times

⊘ Don't:

- Sit down
- Turn your back to cars on course
- Socialize
- Use cameras or iPods
- Leave your post
